

KRB EQUIPMENT PROJECT STORY .06

The expansion of the Panama Canal will allow super tankers to pass through the third lane locks.

KRB Reinforces the largest construction project in the world the Panama Canal

KRB Equipment has been selected for the largest construction project in the world. the Expansion of the Panama canal.

The project consists of the construction of a third wider lane, with two new sets of locks - one on the Pacific and one on the Atlantic side of the Canal. Each lock will have three chambers and each chamber will have three water reutilization basins. **The locks and water basins are expected to contain 250,000 tons of reinforcing steel.**

The steel fabrication and placement will be done by Armacentro of Madrid, Spain. They are involved in major projects throughout the World. www.armacentro.com

After considering proposals from the leading equipment suppliers KRB Machinery was selected because of its ability to meet the intense requirements of this project.
